Notes & Methodology

1. Date Tested: 05/04/2026. Methods: Full QC Panel.
2. The sample was confirmed to be MOT-C by HPLC. Identification by chromatographic retention time comparison with a reference standard.
3. Elemental impurities analyzed by ICP-MS per USP <233> methodology. Acceptance criteria are internal laboratory quality screening limits for research-use materials and do not represent evaluation against any specific pharmacopeial monograph or route-of-administration standard.
